TECHNICAL SKILLS

- Cybersecurity Tools

    Wireshark, Nmap, Metasploit, Burp Suite, Nessus

- Graphic Design

    Using Photoshop , Canva, Freepik high-quality design and visual content creation

- Front-End Development

    HTML, CSS, and JavaScript

- Back-End Development

    Experienced with PHP, MySQL, C, Java and C++

- Microsoft Office 365

    Microsoft Word, Excel, and PowerPoint for comprehensive document and presentation creation

- SQL Server Management Studio

- VMware Workstation

Projects

- **Blood Donation System**

    - Developed a web application designed to streamline and manage blood donation system operations, enhancing user experience and operational efficiency

    - Utilized PHP, MySQL, HTML, CSS, and JavaScript to build the system during the 1st year, 2nd semester.

- **Gallery Cafe Web Application.**

    - The application streamlines donor registration, blood requests, and donation tracking. Utilized HTML5, CSS3, JavaScript, PHP, and MySQL to ensure a responsive, user-friendly, and efficient platform for both users and administrators.

- **DogFood Mobile Application**

    - Features include product browsing, secure user authentication, shopping cart functionality, and educational content on dog health. Developed using Java and XML for Android with Firebase backend services, and tested for iOS compatibility.
